|                   | Established Outpatient                                  | X (only if there is also a psychotherapy add-on) | X                                      | X                                      | X                                      |  |                          |

| Add-On Code | Service Description  | Available in Conjunction With Interactive Complexity |
|-------------|--|--|
| 90785       | Use when at least one of the following communication factors are present during the visit:<br>1. The need to manage maladaptive communication (related to, e.g., high anxiety, high reactivity, repeated questions, or disagreement) among participants that complicates delivery of care.<br>2. Caregiver emotions/behaviors interfere with implementation of the treatment plan.<br>3. Evidence/disclosure of a sentinel event and mandated report to a third party (e.g., abuse or neglect with report to state agency) with initiation of discussion of the sentinel event and/or report with patient and other visit participants.<br>4. Use of play equipment, physical devices, interpreter or translator to overcome barriers to diagnostic or therapeutic interaction with a patient who is not fluent in the same language or who has not developed or lost expressive or receptive language skills to use or understand typical language. | n/a  |
